Simulated geometry and actual gamma paths
Aluminium scatterer
200 × 200 × 40 mm
Gamma source plane
z = −100 mm
2-inch × 2-inch LaBr₃
1 mm PTFE + 1 mm Al
LaBr₃
Gammas illuminating the block
Direct gamma → crystal
Gamma → Al block → crystal
x (mm); y is projected out
Beam axis z (mm) — incident gammas travel left to right (+z)
Side projection; detector shown in central section.
Selected real gamma tracks from a separate 2,000-event run.
